Buenos Aires (UPI): An Argentine Federal Judge has dismissed kidnapping charges brought by the wife of executed Nazi Mass murderer Adolf Eichmann.

Judge Leopoldo Isaurralde said that the effort to identify the men who captured Eichmann was "sterile".

Eichmann's wife lodged charges after Eichmann was captured in Argentina and taken to Israel for trial.

Judge Isaurralde said that his requests for the identity of Eichmann's capturers brought only a brief reply from the Israeli Government that it was "impossible to comply."
